Color UV Resin

Colored UV Resin is a pre-pigmented, UV-curable resin designed for applications requiring vibrant colors with a high-gloss finish. This product is ideal for various craft and decorative purposes, including jewelry making, coatings, and small casting projects. It cures quickly under ultraviolet (UV) light, providing a durable, non-yellowing surface that resists cracking and fading over time.

Colored UV Resin is composed of acrylate oligomers, reactive monomers, photo-initiators, and high-quality color pigments. The resin is free of volatile organic compounds (VOCs) and hazardous air pollutants (HAPs).
