

## Deep Pour Epoxy Resin Up To 4 Inch Crystal Clear & No Yellowing Formula

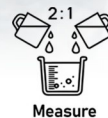

### Deep Pour Resins

EDP4880 Deep Pour Epoxy Resin is an advanced deep pour epoxy resin system, that allows you to pour 2 to 4 inches thick in one go, reducing the risk of errors and streamlining your crafting process.

It is a slow cure epoxy resin which will cure within 48-72 hours at 77 °F degrees creating a clear, glass like finish that resists scratching and yellowing with an extended gel time to minimize exotherm and improved air release.

Enjoy UV resistance, anti-scratch properties, and self-leveling characteristics, perfect for a variety of projects like tray, coaster, wood, counter tops, river table, encapsulating projects, etc.

NO BPA

NO VOC

Max Thickness 4

Crystal Clear

Self Defoaming

UV Resistant

### TECHNICAL OVERVIEW

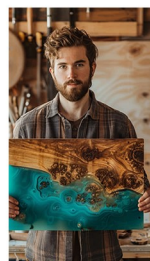

Physical Properties	DATA
Mix Ratio By Weight	2A:1B
Mixed Viscosity CPS.	1000CPS
Pot Life	80mins
Pouring Thickness	2-4inch
Cure Time-25°C	48 hours
Full Cure Time-35C	72 hours
Color	Clear
Shore D Hardness	80D

These tests were conducted at 77°F/25°C.

### Customizable

- Custom Packaging
- Custom Formulations
- Custom Kits  
(measuring cups, molds, stirring rods, etc.)  
to customize the set.
